### On the Mind: Artist Talk featuring Mónica López-González

"On the Mind" is an exhibition that explores varying perspectives on the brain by artists Mónica López-González, Jon Malis, Lee Gainer & Nancy Andrews.

Mónica López-González takes a detailed look at our minds on creativity. Through her studies on improvisation she unfolds what happens when one part of the brain assumes all responsibility in the creative process, while the other part of the brain quite literally lays dormant. Monica states, "I use both improvisatory techniques within black and white photography, and musical improvisation within cinema and theatre to explore the process of spontaneous creative thinking and emotion perception."
